**RE: United Kingdom Declaration of Conformity (UKCA Mark) Relating to MAC Products**

To Whom It May Concern:

Please be advised that the portion of the United Kingdom Directives, which relates to MAC valves, is the “Electrical Equipment (Safety) Regulation 2016”

It is not necessary for the UKCA label to appear on all MAC products. Only products that apply to the UKCA Low Voltage Directive need carry the UKCA mark. Here are the guidelines:

***Low Voltage Guidelines: requiring UKCA Mark***

*All electrical materials destined to be used at nominal voltage and are within the following guidelines:*

*D.C. Voltage (direct current) 75 Volts to 1500 Volts.*

*A.C. Voltage (alternating current) 50 Volts to 1000 Volts.*

Only those MAC Valve solenoids within these two ranges would need to have a UKCA marking. We are not to use the UKCA mark on those valves with coils that do not fall within these voltage ranges.

Respectfully,

A handwritten signature in black ink, appearing to read "JCR", with a long horizontal flourish extending to the right.

Joseph C. Richardson
